European Conference - Bridges for CHILD Combating Health Inequalities in Life-threatening Diseases

November 17-18, 2011 Vienna, Austria

Chair

Univ.-Prof. Dr. Ulrike Salzer-Muhar

Vienna Medical University, Division of Pediatric Cardiology,
Department of Pediatrics and Adolescent Medicine

Univ.-Prof. Dr. Christoph Aufricht

Vienna Medical University, Division of Pediatric Nephrology and Gastroenterology,
Department of Pediatrics and Adolescent Medicine

Whom does the conference address?

- Pediatricians and other doctors involved in pediatric healthcare
- Pediatric healthcare providers
- Hospital managers
- Government officials
- Health insurance officials
- Patients and parents' self-help groups
- Industry representatives
- NGOs

Key topics

- Raising awareness for affected children in different regions of Europe
- Facilitating transfer of best practices in pediatric care
- Pinpointing the existing health inequalities
- Enhancing networking and scientific exchange between the different stakeholders
- Establishing a cross-border healthcare network

Bridges for
CHILD

Objective of the conference

The purpose of this EU co-funded conference is to improve high-end care for children with major organ diseases in new EU member-states, candidate member-states and Western Balkan countries. The conference will provide a very wide-ranging forum for all the stakeholders involved in the care of the affected children. The resulting synergies will contribute to reducing healthcare inequalities. We expect the numerous exchanges at this conference to trigger a substantial number of local, national and cross-border actions.

We look forward to seeing you at the conference!

Ulrike Salzer-Muhar & Christoph Aufricht
